

Transitioning to SAP's Database Platform?

For a smoother and faster transition from testing into production, [Surveillance DB™](#) delivers advanced database analytics into the application-testing arena by constantly tracking key performance indicators to discover bottlenecks as they occur and mitigate production risk.

... So take the guess work out of database tweaking to right-size an application for any sized application.

IT operations worldwide rely on **Surveillance DB for SAP Sybase** for essential visibility into SAP applications that run data-intensive, industry-specific and business-support processes.

*Available for SAP Sybase ASE, ASE Cluster Edition, IQ, and Replication Server
Also supports Oracle, SQL Server, DB2-UDB & MySQL for heterogeneous environments*

SAP Sybase ASE Health Window... [Click to Enlarge](#)
